PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of commercial experience building enterprise web applications with ASP.NET Core, C#, Angular, TypeScript, EF Core, and SQL Server. Experienced in Clean Architecture, CQRS/MediatR, SOLID, RESTful APIs, authentication/authorization, third-party integrations, performance optimization, and CI/CD. Hands-on with AI-assisted software development and LLM/agentic workflows using Claude Code and OpenAI Codex. Strong focus on maintainable, testable, secure code, technical ownership, code reviews, and practical engineering standards.

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer | Asgatech, Cairo, Egypt *Apr 2025 – Present*

- Architect and develop scalable ASP.NET Core applications using **Clean Architecture, CQRS, MediatR, and SOLID principles**, with a focus on maintainability, testability, and secure software design.
- Built features for **Wafi**, an off-plan sales and leasing platform (Real Estate General Authority, REGA), covering developer qualification, project licensing, escrow, document workflows, and regulatory processes with ASP.NET Core and Angular.
- Apply **AI/LLM technologies and AI coding agents** to accelerate software development, code analysis, refactoring, documentation, debugging, and implementation of complex features using tools such as **Claude Code and OpenAI Codex**.
- Explore and apply **LLM/AI-agent patterns** for integrating AI capabilities into software products and development workflows.
- Developed workflow features, RESTful APIs, JWT authentication and authorization, Hangfire background processing, file management, localization, and Serilog logging for **WFP**, a government workflow platform, with .NET, Angular, EF Core, and SQL Server.
- Contributed backend and frontend features to the **Najm integration platform**, connecting external services and automating business processes.
- Mentor junior developers through **code reviews, technical guidance, and pair programming**; translate stakeholder business requirements into scalable technical solutions.

Full-Stack Developer | Hadaf Solutions, Hurghada, Egypt *Mar 2023 – Apr 2025*

- Built and shipped full-stack features with .NET and Angular in cross-functional teams across business platforms including **SAMF**, **Accflex** site, and **Trenga**.
- Developed **8Orders**, a multi-restaurant ordering and delivery platform, implementing order-confirmation workflows, restaurant status management, delayed cooking, delivery reassignment, and Hangfire background jobs with .NET, Angular, EF Core, and SQL Server.
- Built **iRecycle, iRecycle B2B, and GE-Enviro** environmental platforms with .NET 8, Angular 19, Clean Architecture, ASP.NET Core Identity, GraphQL, and DevExtreme, covering authentication, business workflows, APIs, and B2B functionality.
- Optimized SQL Server queries and refactored inefficient code paths, improving overall application performance.
- Built CI/CD pipelines end-to-end, enabling consistent, low-friction deployments and faster release cycles.
- Mentored and led junior developers through code reviews and pairing, raising code quality and consistency across the codebase.

Full-Stack Developer | Dynamic Solutions - DSH, Abu Dhabi, UAE (Remote) *Sep 2022 – Mar 2023*

- Developed and maintained full-stack features for an e-commerce platform using .NET, Angular, TypeScript, REST APIs, and SQL Server, collaborating remotely with a multinational team.

.NET Developer | IGT Software Solutions, New Cairo, Egypt *May 2022 – Aug 2022*

- Implemented features for an ASP.NET MVC application in a sprint-based development team.
- Migrated legacy ASP.NET Web Forms modules to .NET Core, modernizing the codebase and improving long-term maintainability.

EDUCATION

- **Full-Stack Web Development Using .NET** — ITI, MCIT | Aug 2021 – Dec 2021
- **B.Sc. Computers and Information Technology** — Minia University | 2015 – 2019
  - *Major: Computer Science and Information Systems*
  - *Grade: Very Good*
  - *Graduation Project: Remote Bus Reservation Website (Excellent)*

TECHNICAL SKILLS

- **Backend: C#,** .NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ, RESTful APIs
- **AI & LLM:** LLM Integration, AI Agents, Agentic Workflows, Prompt Engineering, AI-Assisted Software Development, Claude Code, OpenAI Codex
- **Architecture:** Clean Architecture, CQRS, MediatR, SOLID, Dependency Injection, Modular Design, Domain/Application Layering
- **DevOps & Cloud:** Azure DevOps, CI/CD, Docker, Azure, Git, GitHub, Nginx, IIS
- **Frontend:** Angular, TypeScript, JavaScript, Angular Material, Tailwind CSS, Bootstrap, HTML5, CSS3
- **Databases:** SQL Server, PostgreSQL, MySQL, EF Core, Query Optimization, Indexing, Database Design
- **Caching & Integration:** Redis, REST integrations, Third-party APIs, OAuth 2.0, Webhooks
- **Engineering:** Code Reviews, Refactoring, Debugging, Performance Tuning, Secure Coding, Technical Mentoring

CERTIFICATIONS & COURSES

- .NET Microservices course with Harsha – Udemy

ADDITIONAL INFORMATION

- **Languages**: Arabic (Native), English (Intermediate), German (Basic)
- **Nationality**: Egyptian
- **Military Service**: Completed
